

JTRS Increment 1 Tactical Networking Capability

MUOS
Mobile User Objective System
MUOS Enables Transformational Beyond Line of Sight Communications. Provides critical connectivity in rugged/urban environments & Improves Speed of Command

UHF SATCOM

WNW
Wideband Networking Waveform (WNW) Network Group
Enables high data capacity throughput providing improved Situational Awareness and Speed of Command

JAN-TE
Joint Airborne Networking-Tactical Edge
Provides Net-Centric Sensor-to-Shooter Technology. Enables High Speed/Capacity tactical Networking to Locate, Correlate & Engage Time Critical Targets

SRW
Soldier Radio Waveform
Enables Soldier Networking Capability. Providing Critical Situational Awareness, Enhanced Combat Effectiveness

WIN-T STRATEGIC NW INTERFACE

Army Rotary Wing (AMF-SA)

SRW WNW

Satellite Communication
MUOS Communications
UHF SATCOM Communications

Expeditionary Strike Group
(LHA, LHD, DDG, CG)
(AMF-M/F)
(Link-16 via Legacy-MIDS)

Carrier Strike Group
(CVN, CG, DDG)
(AMF-M/F)
(Link-16 via Legacy-MIDS)

SSGN/SSN/SSBN
(AMF-M/F)
(Link-16 via Legacy-MIDS)
